

GRASSCLOTH WALLPAPER

➤ Differs from other wallpapers because it's not made in a controlled factory environment, but in an Artesanal way.

➤ The structure of the material determines the pattern of the grass wallpaper. It's natural, so patterns are random.

➤ The fibers can vary in size, color or merit. Paneling will occur and that is part of the charm.

➤ The fibers will never line up evenly from one roll to another.
